Per-study edgeR preranked GSEA: Pattern A → intermediate → Pattern B
Study
GSE108643 [A; human]
GSE86931 [A; human]
GSE126962 [A; mouse]
GSE132520 [A; mouse]
GSE151066 [Intermediate; human]
GSE71972 [B; human]
GSE87748 [B; human]
GSE97718 [B; mouse]
REAC | Formation of a Pool of Free 40S Subunits
REAC | Selenocysteine Synthesis
REAC | Viral mRNA Translation
REAC | Eukaryotic Translation Elongation
REAC | Peptide Chain Elongation
REAC | Eukaryotic Translation Termination
REAC | Nonsense Mediated Decay (NMD) Independent of the Exon Junction Complex (EJC)
REAC | Response of EIF2AK4 (GCN2) to Amino Acid Deficiency
REAC | SRP-dependent Cotranslational Protein Targeting to Membrane
REAC | Selenoamino Acid Metabolism
REAC | Respiratory Electron Transport
REAC | Interleukin-4 and Interleukin-13 Signaling
REAC | GTP Hydrolysis and Joining of the 60S Ribosomal Subunit
REAC | Cap-dependent Translation Initiation
REAC | Eukaryotic Translation Initiation
GO:BP | Cytoplasmic Translation
REAC | L13a-mediated Translational Silencing of Ceruloplasmin Expression
REAC | Formation of the Ternary Complex, and Subsequently, the 43S Complex
GO:BP | Negative Regulation of Syncytium Formation by Plasma Membrane Fusion
GO:BP | Negative Regulation of Myoblast Fusion
REAC | Assembly of Collagen Fibrils and Other Multimeric Structures
REAC | SARS-CoV-1 Modulates Host Translation Machinery
GO:BP | Platelet Aggregation
KEGG | AMOEBIASIS
KEGG | VALINE, LEUCINE AND ISOLEUCINE DEGRADATION
GO:BP | Positive Regulation of Biosynthetic Process
KEGG | IGSF CAM SIGNALING
REAC | Aerobic Respiration and Respiratory Electron Transport
GO:BP | Oxidative Phosphorylation
GO:BP | Proton Motive Force-Driven ATP Synthesis
GO:BP | Proton Motive Force-Driven Mitochondrial ATP Synthesis
REAC | Complex I Biogenesis
GO:BP | Fatty Acid Beta-Oxidation
GO:BP | Mitochondrial ATP Synthesis Coupled Electron Transport
GO:BP | Aerobic Electron Transport Chain
KEGG | RIBOSOME
KEGG | FATTY ACID DEGRADATION
REAC | Mitochondrial Fatty Acid Beta-Oxidation
GO:BP | Protein Biosynthetic Process
REAC | Mitochondrial Translation
REAC | Mitochondrial Translation Initiation
REAC | Mitochondrial Translation Elongation
Pathway (● = FDR < 0.05)
