GO Biological Process
KEGG
Reactome
GSE211204
Aerobic Electron Transport Chain (GO:0019646)
Mitochondrial ATP Synthesis Coupled Electron Transport (GO:0042775)
Myofibril Assembly (GO:0030239)
Cellular Respiration (GO:0045333)
Sarcomere Organization (GO:0045214)
Actomyosin Structure Organization (GO:0031032)
Diabetic cardiomyopathy
Oxidative phosphorylation
Huntington disease
Cardiac muscle contraction
Hypertrophic cardiomyopathy
Dilated cardiomyopathy
Aerobic Respiration and Respiratory Electron Transport
Striated Muscle Contraction
Respiratory Electron Transport
Muscle Contraction
Complex IV Assembly
GSE113165
Myofibril Assembly (GO:0030239)
Sarcomere Organization (GO:0045214)
Actomyosin Structure Organization (GO:0031032)
Muscle Contraction (GO:0006936)
Cardiac Muscle Contraction (GO:0060048)
Cardiac Muscle Cell Development (GO:0055013)
Cardiac muscle contraction
Diabetic cardiomyopathy
Dilated cardiomyopathy
ECM-receptor interaction
Protein digestion and absorption
Muscle Contraction
Striated Muscle Contraction
Aerobic Respiration and Respiratory Electron Transport
Non-integrin membrane-ECM Interactions
Collagen Chain Trimerization
ECM Proteoglycans
GSE234465
Sarcomere Organization (GO:0045214)
Myofibril Assembly (GO:0030239)
Actomyosin Structure Organization (GO:0031032)
Cytoplasmic Translation (GO:0002181)
Regulation of Heart Contraction (GO:0008016)
RNA Processing (GO:0006396)
Hypertrophic cardiomyopathy
Dilated cardiomyopathy
Coronavirus disease
Proteasome
Ribosome
Striated Muscle Contraction
Muscle Contraction
Regulation of Expression of SLITs and ROBOs
Eukaryotic Translation Termination
Signaling by ROBO Receptors
